

ENERGY POLICY

Declaration of Commitment

Universiti Teknologi Malaysia is committed to implement sustainable energy management best practices throughout its campus in order to create a conducive and sustainable campus environment for teaching, learning, research and intellectual development.

Statement of Policy

Universiti Teknologi Malaysia's (UTM) policy is to establish a sustainable energy management system to enable continuous, effective and widespread implementation of energy efficiency, conservation practices and renewable energy initiatives at all departments within UTM. The process and procedure adopted shall enable the establishment of measurable energy reduction targets and Energy Efficiency Index without compromising reliability, comfort, security and safety. The energy management system will be driven and motivated by creative and innovative initiatives from within the UTM community. UTM Energy Policy will be managed by a Resident Energy Manager who will also manage compliance issue.

ENERGY POLICY GUIDELINES

- To consume energy in the most efficient, economical and environmentally responsible ways.
- To apply the latest technology as well as energy efficiency practices in all aspects of organization operation.
- To constantly seek achievable reductions in energy consumption.
- To manage energy efficiency taking into consideration the requirements of law and reliable operation of the systems in use at the installation.
- To provide training and information for relevant staff in energy efficiency management.
- To contribute to the efforts of the government in reducing the emission of harmful gasses, including carbon dioxide.
